

Six Sigma

An Introductory Seminar for Managers and Executives

Companies around the world have implemented Six Sigma and programs to:

- Improve Customer Satisfaction
- Maximize Process Efficiencies
- Increase Competitive Advantage
- Maximizes Market Share
- Save Millions in Operating Expenses

WORKSHOP DESCRIPTION

This seven (7) hour training workshop, led by MAP Quality Engineering, introduces the proven Six Sigma methodology for driving and achieving process improvement within an organization. Six Sigma is a business improvement process that focuses on customer requirements, process alignment, analytical rigor, and timely execution. This workshop introduces the Six Sigma methodology, outlines proven Six Sigma techniques, highlights case studies that demonstrate how to realize savings and to measure return on investment, and provides for questions and answers.

WORKSHOP PURPOSE

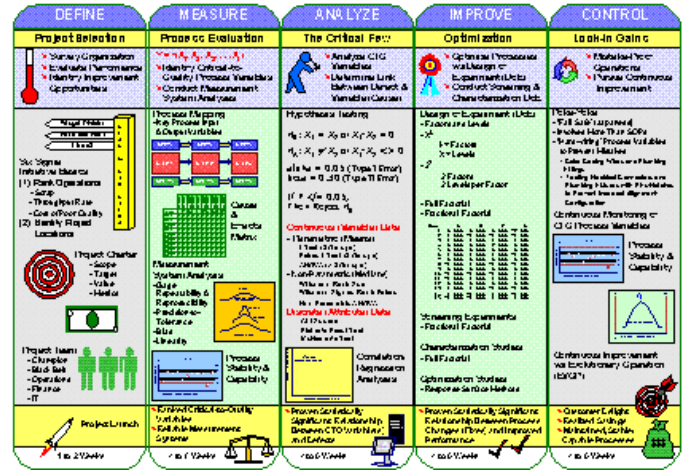

This workshop is designed to enable attendees to evaluate how Six Sigma programs can achieve measurable results, and, as appropriate, to provide an avenue for initiating Six Sigma techniques within your organization.
